Jack Doyle
Coastal Steel and Acoustics
7011 Highway 90
Longs, SC 29568

To Whom It May Concern:

Bovis Lend Lease worked with Coastal Steel and Acoustics on the Bid Package 4 and 4A of the Market Commons project in Myrtle Beach, South Carolina for the last 18 Months. CSA performed approximately \$5,000,000 of scope both directly for Bovis Lend Lease and as a subcontractor to Worthington Industries. Their scope included the erection of Dietrich Structural Metal Framing system, performed for Worthington, and all drywall installation/finishing and miscellaneous framing and sheathing for Bovis Lend Lease.

Given Bovis Lend Lease's experience with CSA for both of these scopes of work I would recommend them to any project. CSA worked seamlessly with BLL to provide whatever means necessary to complete the work on time and within the quality standards in the contract documents. CSA change pricing is reasonable and sound. Their paperwork is kept up to date and their knowledge of the systems is excellent.

Should you need any further information regarding CSA please feel free to contact me at the information below.

Yours sincerely,
